

ENGINEERED IRONY.

ENGINEERED IRONY.

David W. Jackson

Crossing Octave Chanute's Kansas City Bridge for Trains and Teams, 1867-1917

In 1870, engineers Octave Chanute and George Morison published a report describing their greatest achievement to date, *The Kansas City Bridge*, aka the Hannibal Bridge, which opened on July 3, 1869.

- A chronological gallery of every known image of the bridge over its nearly 50-year life span
- A tribute naming the hundreds of men who built the engineering feat, and a memorial to those who died
- An Octave Chanute biography, and short bios of other engineers
- An edited reprint of Chanute and Morison's 1870 report, *The Kansas City Bridge*
- Two volumes, 226- and 459-pages respectively (order separately)
- Historical illustrations, maps, documents, nearly 500 endnotes, an expansive bibliography, and index
