You will note cars as shown on above are in numerical order. This circular will also have a listing of cars in firm and agent assignment in alphabetical order also shown number of cars assigned at each point and series of cars. There is also another exhibit showing cu. ft. capacity, inside dimensions, whether insulated or not and number of cars we have in our fleet. As further information, we have listed covered hoppers, air slides and special Gondola cars as added information particularly for on line agencies. The listings of assigned cars by firms and agents are as follows: See pages 10 and 11.

Assigned cars must stay in assigned service and should not be used without authority of Mr. Thomas G. Kees, Chicago.

You will note we have listed all special box equipment in this circular as insulated or not insulated in numerical order which should save time in locating assignment of car.

Orders for empty equipment should be placed with this office.

As a precautionary measure, you should not move an empty car over a road unless that line received the loaded haul in conjunction with our line; otherwise we may receive a bill for the excess empty haul at tariff rate. Return empty car via reverse of loaded move to its assignment on non-revenue billing.

This circular is issued so that you will bill cars accordingly. Please see that cars are moved promptly. Also be sure you check Central Service Bureau reports for loads and empties to avoid excessive detention at loading points. This circular took much time to prepare so read it over carefully, refer to it frequently and use it as your guide to handle cars without delay and send empty to its proper assignment. Many of you do not have equipment registers and this guide should answer many of your problems.

Thomas G. Kees
 Manager, Special Equipment
