

Posted by Russ Strodtz on Railway Bull Shippers List

Model from Red Caboose looks great. Actually found some in service. Is it possible that the car could also fill in as a UP or OSL prototype or any other road?

Was able to locate a few months of interchange records from 1959 for the CB&Q-IHB at Congress Park IL. These are the Conductor's setout lists, prepared right off the waybills. As to accuracy I'm at the mercy of those lists. Some are readable, some are not. Some show a lot of information, some are just lists of numbers. Have decided that the best way to transcribe these is by a 24 hour period. Try to pick days that look interesting and where most of the lists are readable and show enough data to make them meaningful.

In addition to cars that were actually delivered to the IHB many show other set outs. These cars are included and are clearly identified.

Here goes 05-Apr-59:
